

IMPROVE YOUR DIAGNOSTIC AND TREATMENT SKILLS FOR IBS

By Attending this Complimentary CME Event

“Better Understand the Symptoms and Care Options of IBS”

Houston, Texas

Wednesday, March 8, 2023

6:30 - 9:00pm

Maggiano's Little Italy

2019 Post Oak Blvd.

Hosted by Harris County Academy of Family Physicians

Nearly 1 in 10 adults and nearly 15% of children suffer the fluctuating symptom patterns of abdominal pain, disturbed defecation, and extra-intestinal symptoms associated with Irritable Bowel Syndrome. IBS-C and IBS-D represents a significant health burden owing to direct medical costs and indirect costs. Misdiagnosis and under treatment leads to waste and unnecessary patient suffering.

Diet, stress and other sociocultural factors can influence prevalence, health care-seeking behavior, symptoms, and treatment response. Regrettably, practicing physicians and mid-level providers do not always fully understand the pathways and treatment options available now and those in development.

Topics to be covered in this highly interactive seminar include:

- ▶ Explore the pathways and symptoms of those with Irritable Bowel Syndrome with Diarrhea and Constipation
- ▶ Summarize the underlying physiologic and psychological determinants of IBS symptoms.
- ▶ Review the diagnostic criteria and available tests.
- ▶ Develop individualized treatment plans for patients with IBS by applying new clinical data.
- ▶ Explore sucrase isomaltase (SI) deficiency and its similar symptoms to IBS-D
- ▶ Assist patients and their families to recognize the causes and treatments for IBS so they can partner with clinicians to manage symptoms and treatment - especially important for younger patients.
- ▶ Review the benefits, efficacy, safety and mechanism of action of the most current FDA approved treatment options and OTC options.

Those who complete this activity will better identify how to screen, diagnose and treat their patients with IBS-C and IBS-D

There is no charge for this event, but space is limited and Pre-registration is Required.
